The Internationally Recognized Standard for Excellence

CPIM provides a common basis for individuals and organizations to evaluate their knowledge of the evolving field of production and inventory management. The program has helped individuals and their organizations become more productive and competitive because it is designed to test candidates' in-depth knowledge of a variety of subjects specific to production and inventory management.

Introduced in 1973 and reconfigured in 2000, CPIM continues to live up to its mission of educating individuals in the concepts, tools, terminology, and integration of topics across operations functions.

CPIM has helped more than 66,000 professionals

- learn to predict outcomes more accurately and take actions that achieve results
- gain peer and industry recognition
- contribute to their organizations' success through increased efficiency across the processes of the supply chain
- earn college credit.

Execution and Control of Operations

Focus on the areas of prioritizing and sequencing work, executing work plans and implementing controls, reporting activity results, and providing feedback on performance. The course explains techniques for scheduling and controlling production processes, the execution of quality initiatives and continuous improvement plans, and the control and handling of inventories. Topics include

Prioritizing and Sequencing Work
Executing Plans and Implementing Controls
Authorizing and Reporting Activities for Push and Pull Systems
Evaluating Performance and Providing Feedback.

Short biography for Instructor:

Fred Heintz, CPIM, CIRM

Fred has extensive experience implementing ERP systems and discrete applications, from a simple one plant manufacturing implementations to a global single instance SAP ERP program. He has worked on over twenty successful installations, with software for Distribution as well as the Manufacturing Planning side of the business.

His ability to guide the organization through the changes required by new software is enhanced by the ability to quickly grasp those business processes crucial to the company's success. Changing processes, while keeping the business core competencies, is crucial to maximizing the effectiveness of any software implementation.

Fred guides organizations skillfully through the cultural and organizational changes required to implement new information systems.

Fred has a Bachelor of Science degree in Finance from Central Connecticut State University where he graduated with high honors. He has achieved both CPIM and CIRM certification, is an instructor and active member of the Hartford Chapter of APICS.
